Miami Conservancy District Funding

The Miami Conservancy District has generously committed their support for the Litehouse Demonstration Homes project. The funding will be used for water conservation enhancements such as rain gardens, porous walks and driveways and native landscaping to help mitigate soil erosion and runoff. Funding has also been provided for educational and promotional materials focusing on water conservation. These funds are provided through the US Environmental Protection Agency.

We thank The Miami Conservancy District for selecting the Litehouse as the recipient of this grant!

Lite Bites are produced by the Litehouse Development Group to provide the latest information about the Litehouse homes, and the responsible approach to home building, by delivering an affordable, energy efficient, and sustainable home concept to the market.
